

## Miwahimoon – a unique composition

Like with any complex essential oil blend, which is the base for any perfume or cologne, the work of creation is much like the writing of a symphony. It takes time and patience and of course, an extremely well developed sense of smell.

You cannot just mix a bunch of oils together and hope for the best. In the traditional art of French perfumery, one basically maps out top, middle (also called heart note) and bottom notes and then the composing starts. Many tests later, one has found a blend that corresponds to what the original intent was.

Miwahimoon is Blue Eagle's latest creation. This time he teamed up with a renowned French perfume designer and they have masterminded a combination that is getting a unanimous response from people who experience it. They love it because it makes them feel great immediately; they experience calmness, peace and overall wellbeing. Below, you will discover why this is so.

Miwahimoon is different from our Liquid Smudge in the sense that it is designed to stay. This makes it possible to use it as cologne which will stay and evolve as the day goes on.

We have broken down the composition into top, middle and bottom notes. Each oil has a different effect. You will find that the fragrance evolves over time and migrates through the notes.

Top note:

The top note is principally composed of citrus essences, with floral and fresh notes intertwined

- **Bergamot** - fresh, orange/lemon/citrusy, slightly floral
- **Lemon** - aroma similar to fresh lemon rinds except it is richer and more concentrated
- **Mandarin** – very sweet, citrusy, fruity
- **Petitgrain** – fresh, woody and floral
- **Neroli** – intensely floral, citrusy, sweet and exotic
- **Rosemary** – fresh, herbaceous, sweet

All this combines into immediate stress release; relaxation is almost immediate and one feels refreshed and uplifted. The floral notes contribute to the top note by inspiring beauty.

Middle/Heart note:

- **Neroli** – intensely floral, citrusy, sweet and exotic

- **Rosemary** – fresh, herbaceous, sweet
- **Ho Wood** (linalool) – woody, floral, sweet
- **Lavender** – fresh, sweet, floral, herbaceous, slightly fruity
- **Basil** – sweet, herbaceous, liquorice-like, slightly camphoraceous
- **Virginian Cedarwood** – fresh, woody, balsamic
- **Vetiver** – woody, earthy, herbaceous, spicy, almost smoky

As you noticed, Neroli and Rosemary continue evolving into the heart note. Together with the other ingredients, they allow for more and deeper relaxation. Stress starts to dissipate quickly, calmness takes its place, you feel fresh and in the long run, you may find that your immune system is boosted.

Bottom note:

- **Benzoin** – rich and warm, slightly woody, creamy, vanilla
- **Tonka Beans** – subtle mix of vanilla and caramel, midrange between soft caramel and cocoa
- **Sweetgrass\*** – herbaceous, sweet, warm, almost smoky, inspires beauty (proprietary formula)
- **Vanilla** – rich, sweet, warm
- **Vetiver** – woody, earthy, herbaceous, spicy almost smoky
- **Cistus** – intense, woody, amber

The bottom note lingers and subtly releases its mix of sweetness and woodiness all day long, without ever being overpowering. Our Sweetgrass extract lends a particular refined touch to the entire composition and all the essences contribute to boosting the nervous and the immune system.

A real subtle delight! Enjoy.

#### \* **Sweetgrass extract: a scientific breakthrough**

Sweetgrass is called “Hair of Mother Earth” by the First Nations’ people. We have succeeded in developing **an authentic Sweetgrass extract** from the plant. This was the result of research project that took 1 year to complete and it is **unique**.
